

JOSHUA LANZ A REGALADO

Entry-Level Laravel Developer with hands-on experience building secure, multi-tenant web applications and implementing modern CI/CD workflows. Proficient in PHP, Laravel, MySQL, and developer tooling (Vite, GitHub Actions, PHPStan). Skilled in gathering client requirements, writing maintainable code, and collaborating in team environments. Seeking to contribute clean architecture practices and problem-solving skills to a junior software development role.

Education

Bachelor of Science in Information Technology

PHINMA Union College of
Laguna

2020 - 2026

Technical Skills

- Backend & Frameworks: Laravel, PHP, RESTful API Design, Multi-tenancy Architecture, Spatie Packages (Permission, Multi-tenancy)
- Frontend & Build Tools: HTML5, CSS3, Vite, npm
- Database: MySQL, Database Normalization, Query Optimization
- DevOps & Testing: Git & GitHub, GitHub Actions (CI/CD)
- Systems & Security: Role-Based Access Control (RBAC), Activity Logging / Audit Trail, System Troubleshooting & Debugging

Soft skills

- Team Collaboration & Stakeholder Communication
- Client Requirement Gathering & Progress Reporting
- Leadership & Code Review Practices
- Problem-Solving, Active Listening & Adaptability

EXPERIENCE

JUNIOR LARAVEL DEVELOPER (OJT) | MUNICIPALITY OF STA. CRUZ, LAGUNA | 2026

- Developed and deployed a municipal document uploading system using Laravel and PHP, streamlining local government workflows.
- Collaborated with municipal staff to gather functional requirements, translate them into technical specifications, and deliver iterative updates.
- Participated in peer code reviews, implemented bug fixes, and optimized system performance to ensure stability for end-users.
- Maintained clear documentation and communicated progress to non-technical stakeholders, ensuring alignment with project milestones.

BUILDING INVENTORY MANAGEMENT SYSTEM | 2026 (PRESENT)

- Architected a multi-tenant application using spatie/laravel-multitenancy to support isolated data across multiple warehouse locations.
- Engineered Role-Based Access Control (RBAC) with spatie/laravel-permission, permissions across Admin, Manager, Staff, and Viewer roles.
 - Configured automated CI/CD pipelines via GitHub Actions, integrating PHPUnit testing and PHPStan static analysis to enforce code quality.
 - Designed a normalized MySQL database with 20+ relational tables handling stock tracking, purchase orders, and sales workflows.
 - Implemented activity logging and audit trails to track user actions and ensure system accountability.

PHINMA UNION COLLEGE OF LAGUNA

COMPUTER LABORATORY ASSISTANT | 2021 - 2025

- Provided technical support and software troubleshooting for students and faculty, resolving hardware/software issues efficiently.
- Assisted in maintaining computer lab equipment, supporting campus IT activities, and managing digital ID card production.
- Developed strong problem-solving, adaptability, and client-facing communication skills in a fast-paced academic environment.
